Maze Generator
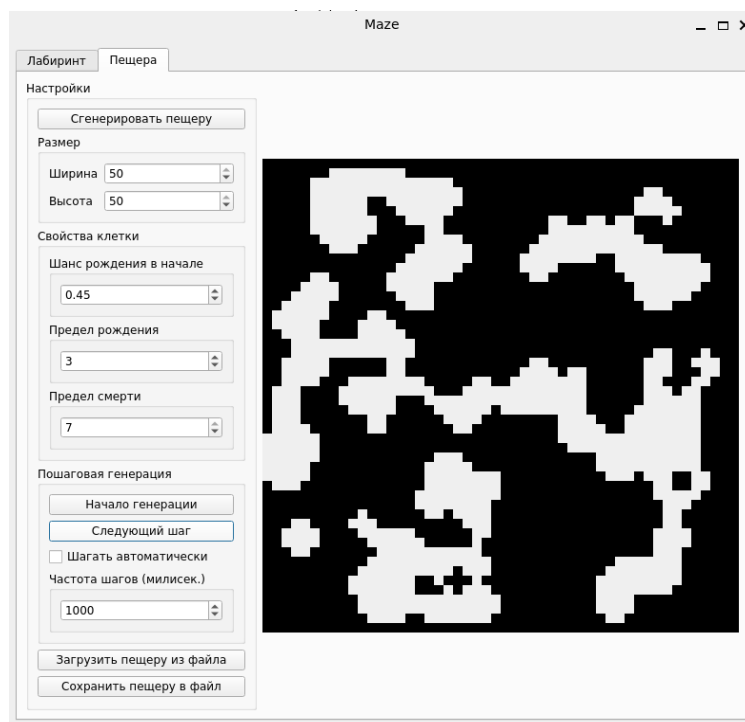

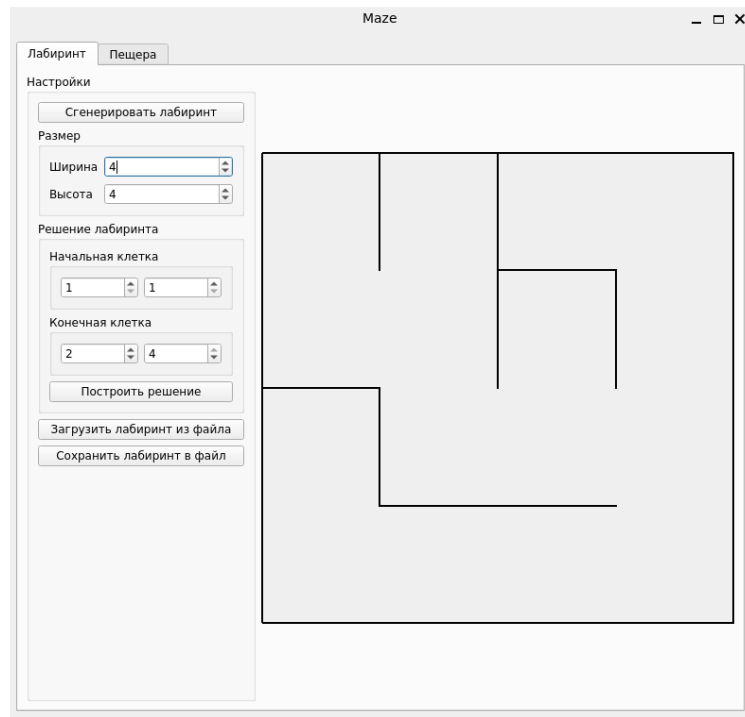

PpoutinBoyZ

November 2022

Introduction

MazeGenerator is a software designed to generate mazes and caves.

Let's take a look at the ui of the maze generator.

You can choose between two modes: "maze" and "cave".

In both modes you can specify parameters of generation on the left and see the results of generation on the right.

Also there is the possibility to save and load maze/cave.

Maze Generation
Let's try to generate a maze and solve it!

1. Set the size of our maze
2. Click generate maze
3. Set coordinates of start and finish points
4. Click solve button
5. Enjoy result
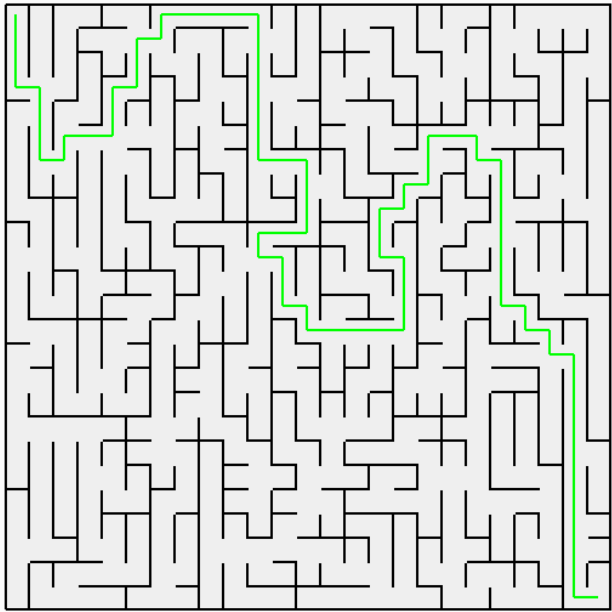

Cave Generation

Let's Generate a cool cave!

1. Set preferred generation parameters
2. Press generate button
3. Keep pressing on NextStep Button until you like the result or press auto step check box
4. Enjoy result! Remember you can save cave in file by pressing save to file button
